Subject: Proposal No. P-4952

Dear Ed:

25X1D

25X1A 1. Rework the existing breadboard and test with actual magnetic tape signals furnished by the customer.

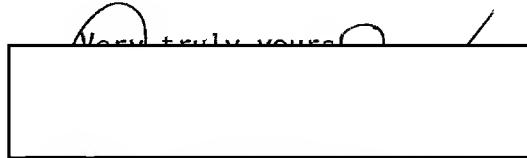

25X1A 2. Send the reworked breadboard to one or both present locations for further tests by operators. Contractors field representative, should be used as an advisor during these tests.

25X1A 3. Rework prototype units per above changes. This work may either be accomplished at contractors facility or, if not too extensive, it may be accomplished in the field by *the contractor's
representative*.

25X1A 4. Rework documentation and publish Instruction Manual.

The estimated cost of this program, excluding time and travel, is shown on the attached sheet.

Please advise the undersigned if there are any questions concerning the above.

25X1A
